

Unless you have lived in a mountainous area such as the Pocono chain, you could not possibly realize the benefits of satellite radio. In Ringtown, we have very little access to either am or fm reception because we are in a valley completely surrounded by mountains. XM satellite radio has changed our lives because it gives us the freedom to move away from the tv and pursue our other interests, while still keeping on top of the news, weather and traffic.

Without satellite radio, how do you expect one will be on top of the traffic conditions when one is travelling? We visit our children in Massachusetts quite often and satellite radio provides us with a clear picture of the weather and traffic. As we are not familiar with the local broadcasting stations as we pass through from State to State, satellite radio is the perfect solution to us.

Please do not let special interests destroy this phenominal innovation.
